JEREMIAS INDUSTRIES

Ever since the company was founded, the Jeremias philosophy has been characterized by an equally strong and cautious expansion plan. With six production facilities worldwide, four trading branches and numerous national and international sales partners, we can guarantee our customers optimal service and permanent availability regardless of location. Thousands of projects realized worldwide speak one clear language: We are always and everywhere there for you!

JEREMIAS INDUSTRIALS (EARLIER: ENGELHARDT GMBH SES)

Due to increasing industrial demands, steel construction has been developed to supplement the chimney element, which successfully made static construction and special structures possible for our international customers.

At Jeremias, the focus is on the steel chimney segment and the system components starting after the energy supplier. In addition to the classic chimney, Jeremias also produces and assembles flue gas conveyors, silencers, compensators and much more.

Our goal is to ensure the future of our company with healthy growth, innovative products and with highly qualified and motivated employees in a sustainable way.

Customer focus is also priority number one for us. Our relationships to business partners domestic and abroad, which very often last for decades, are characterized by a partnered and fair interaction.

OUR SERVICE RANGE INCLUDES:

Over the course of time, Jermias established itself as the leader of the industrial chimney segment and has become one of the largest manufacturers in the German market.

REPERATION OF BASIC DATA / REQUIREMENTS

- Exhaust gas data
- Piping
- Assembly situation

PLANNING

- Consulting
- Cost estimation
- Feasibility
- Creation of CRFs

INVOICES

- Static calculation
DIN V 4133 / EN 1993-3-2 / ASME / CICIND
- Cross-selection calculation according to valid standards
(13084-1)
- Foundation sizing
- Determination of the resonance frequency
- Transverse vibration validation
- Design of the chimney construction
- Noise/sound calculation

SCHMETAIC PLANNING IN 2D AND 3D

- Mega CAD / Solid Works
- Overview drawing
- Individual parts drawing
- Parts lists
- Foundation plans
- Piping

• PRODUCTION IN INDIVIDUAL PRODUCTION LINE AT WAS-SERTRÜDINGEN (GERMANY) LOCATION

- At approx. 4800 m²
- 17.000m² general storage for raw materials and finished products
- Black/white manufacture separation
- 2 laser systems
- Coiling system
- Longitudinal welding machine
- Circular bending machine

ORGANISATION LOGISTICS

- Transport
- Crane provision
- Scaffolding

ASSEMBLY

- Measurement
- Fixed deadlines
- Supervisor
- Assembly personnel

REGULAR MAINTENANCE IN THE FORM OF CONDITION MONITORING

- Initial analysis
- Yearly maintenance

EXAMPLE TIMELINE

1. Wk Data collection	3. Wk Drawing V1	5. Wk Changes	6. Wk Creation V2	7. Wk Approval	15. Wk Production	approx. 15. weeks*
1 week	2 weeks	2 weeks	1 week	1 week	8 weeks*	

* amount of production time / planning time is variable depending on the project.

ZERTIFIZIERUNG

Die Zertifizierung ist ein Prozess, bei dem ein unabhängiges Zertifikat ausgestellt wird, das bestätigt, dass ein Unternehmen oder eine Organisation bestimmte Standards erfüllt. Dies kann in Bezug auf die Qualität, die Umwelt, die soziale Verantwortung oder die ethischen Standards sein.

Die Zertifizierung kann ein Unternehmen helfen, seinen Ruf zu verbessern, die Kundenzufriedenheit zu erhöhen und die Wettbewerbsfähigkeit zu steigern. Es kann auch dazu beitragen, die Risiken zu reduzieren und die Compliance mit gesetzlichen Anforderungen zu gewährleisten.
