SINGLE WALL SYSTEMS

OVERVIEW	10
EW-FU Exhaust system made of stainless steel 0.6 mm	12
EW-ALBI Pressure-tight exhaust system made of stainless steel 0.6 mm	25
EW-SILVER Condensate acid-resistant exhaust system made of stainless steel	32
EW-LINE FLEX FU Flexible exhaust system made of stainless steel	42
EW-LINE FLEX AL Pressure-tight, flexible exhaust system made of stainless steel	46
EW-KL Conical sealing exhaust system made of stainless steel	51
EW-PPS Pressure-tight exhaust system made of plastic	60
EW-PP-FLEX Pressure-tight, flexible exhaust system made of plastic	70

74

CONCENTRIC SYSTEMS

OVERVIEW	75
TWIN-GAS Concentric exhaust system for decorative gas fireplaces Conical connecting line TWIN-GAS-VISION	76 81
TWIN-PL Pressure-tight, concentric connecting line	82
TWIN-P Pressure-tight, concentric exhaust system	89

98

DOUBLE-WALL SYSTEMS

OVERVIEW	99
DW-FU Exhaust system made of stainless steel with 32.5 mm insulation	101
DW-AL Pressure-tight exhaust system made of stainless steel with 32.5 mm insulation	120
DW-SILVER Condensate-acid-resistant exhaust system made of stainless steel with 32.5 mm insulation	134
DW-ECO 2.0 Exhaust system made of stainless steel with 25 mm insulation	148
DW-ECO 2.0 AL Pressure-tight exhaust system made of stainless steel with 25 mm insulation	162
DW-BLACK Powder-coated exhaust system made of stainless steel with 25 mm insulation	173
DW-KL Conical sealing exhaust system made of stainless steel Conical sealing connection line DW-KH	177
DW-VISION Clamp band-free exhaust system made of stainless steel with 32.5 mm insulation	194
DW-POWER 2.0 Double-walled, pressure-tight system exhaust system made of stainless steel with seal in the outer casing	202

210

LIGHTWEIGHT SHAFTS

OVERVIEW	210
FURADO-F shaft system for solid fuel fireplaces	212
• Shaft elements	214
• Components EW-FU	217
• Components DW-FU above roof	220
• Components DW-ECO 2.0 above roof	220
• Chimney covering	224
• Shaft sealing	225
• Package suggestions	226
FURADO-F-LAS Concentric shaft system for solid fuel fireplaces	232
FURADO-A shaft system for oil/gas fireplaces	234
• Shaft elements	236
• Components EW-ALBI	239
• Components EW-KL	240
• Components EW-PPS / EW-PP-FLEX	241
• Components room air independent via roof	243
• Components room air dependent via roof	244
• Chimney covering	245
• Shaft sealing	246
• Mounting examples	247

YOUR PARTNER JEREMIAS

The Jeremias Group, headquartered in Wassertrüdingen (Bavaria), is one of the world's leading manufacturers of flue systems and chimney systems in all areas of heat and power generation for industrial and residential applications.

Strong, open and international – that's how we have been presenting ourselves for more than 50 years. Worldwide production sites and sales offices represent entrepreneurial success, ambitious visions and healthy growth.

With innovative products, outstanding service and highly qualified employees, we want to inspire our customers every day and achieve the goal of sustainable joint success.

Currently, our product range includes more than 100 different CE-certified systems for private and commercial applications as well as free-standing steel chimneys with a diameter of up to four meters.

This pricelist provides you with a comprehensive overview of characteristics, application and installation of Airtight sealing solutions for exhaust systems.

SERVICE

- Highly flexible production
- Individual solutions according to customer request
- Planning support and design consultation
- Chimney cross-section calculation
- Verifiable chimney statics
- Country-specific approvals
- Excellent customer service
- Free software solutions

QUALITY

- More than 100 CE certified systems
- CNC laser- and punching technology
- Special stainless steel alloys
- Polished weld seams impervious to condensate / gas
- 25 year warranty
- ISO 9001 certified

INNOVATION

- Largest range of products on the market
- Joint system developments with boiler, CHP plant and stove manufacturers
- Inhouse development of manufacturing machines
- Own test bench for stainless steel chimney systems and silencers
- Computer-based simulations

SHIPPING OPTIONS

Within Germany, we deliver free of charge from a net order value of €600, below which we charge €60 per pallet. For shipments by parcel service, the shipping costs per package are 15 €, from a net order value of 350 € the delivery is free of charge.

Should you need not specially marked items from our range for an urgent order, we can organize express delivery by parcel service or a forwarding agent.

In this case, please contact our order department in Wassertrüdingen, Tel. +49 9832 68 68 - 8008.

Our prices for express shipments:

DELIVERY	FORWARDING AGENT	PARCEL SERVICE
Next Day	50,00 €	20,00 €
until 12:00 Clock	90,00 €	50,00 €
until 10:00 Clock	120,00 €	70,00 €
By Night Express	-	Depends on weight
Telephone notification	15,00 €	-
Mail / SMS Avis (standard)	10,00 €	-

Deliveries to private recipients can only be sent with notification by telephone.

For certain postcode areas and islands, not all variants may be possible. For late deliveries despite proper and timely handover of the goods to the carrier / parcel service we do not accept any liability.

DIRECT DELIVERY TO CONSTRUCTION SITES

For direct deliveries from 7 pallets with a fixed unloading date, required lifting platform or other special requirements, we charge a flat rate of € 450.00

DELIVERIES BY FORWARDING AGENCY

In general, we assume a parking permit for forwarding deliveries, the risk of liability for damage and loss is transferred to you as the recipient when the goods are parked. If you do not agree to this, you can submit your objection to this regulation by e-mail to pia.meyer@jeremias.de.

RETURN SHIPPING

A return of goods can only be accepted if the return delivery note has been filled out accordingly. For goods returned not due to a faulty delivery by Jeremias, we charge a fee of 60 euros for the first pallet for pick-up within Germany, and an additional 30 euros for each additional pallet. For parcel services, the fee is 15 euros. In the case of collections abroad, the fees must be clarified on a case-by-case basis. Alternatively, the goods can be sent back to us at your own expense.

SINGLE WALL SYSTEMS

At a glance

SINGLE WALL SYSTEMS

At Jeremias you get high-quality, single wall flue systems made of stainless steel or polypropylene for the relining of existing (bricked) chimneys or as a connection line from the boiler to the chimney. We offer you the right system solution for every conceivable application, a variety of diameters, materials and surfaces.

ALL OUR SINGLE WALL FLUE SYSTEMS ARE CHARACTERIZED BY:

- CE certification or building authority approval
 - Simple assembly thanks to precisely fitting elements and plug connections
 - No welding required on the construction site
 - Stainless steel: TIG inert gas welded and passivated longitudinal seams for the highest possible level of protection against corrosion
 - Polypropylene (PP): heating element butt welded seam according to DVS 2207 T11
 - Condensate and gas tight
 - For overpressure systems we use high-quality sealing materials for a long service life
-

SURCHARGES FOR DIFFERENT DESIGNS:

MATERIAL

- 1.4539 Resistant to condensate acid up to 600 °C (see EW-SILVER system)
- 1.4828 operating temperature up to 1000 °C, price on request
- Others on request

VARIANTS

- Oval +15%
- Reinforced design of molded parts +25%

WALL THICKNESS

- EW-FU 0.8 mm Price 0.6 mm +15%
- EW-KL on request

RETURN OF GOODS

- We accept the return of undamaged and packaged goods up to Ø 250 mm
- A return of goods is only possible with a return delivery note
- For single wall systems we charge a return fee of 20%
- The following goods are **excluded from return**:
 - Custom-made, oval, brushed, reinforced design
 - Wall thickness 0.8 mm, 1.25 mm, 1.50 mm
 - Material 1.4539 and 1.4828
 - All single wall systems in Ø 140 mm
 - EW-LINE FLEX FU components with glued-in seal

NOTE

XX
The distances to combustible components depend on the diameter.
We therefore refer to our declaration of performance, which you can download from our homepage.

DESCRIPTION

Single wall flue system made of stainless steel for the modernization and cross-section reduction of existing domestic chimneys or for use as a connecting pipe

MATERIAL

1.4404(316L) / 1.4571 (316Ti)
1.4828 possible for a surcharge
Others on request

FINISHING

Matt

WALL THICKNESS

0.6 mm
Others on request

INSIDE DIAMETER

80 - 600 mm
Others on request up to 1200 mm

INSULATION

Insulating shells available as an option

CONNECTION

Socket / bead

ORDER CODE

The article code for your order results from:
Article code + Ø (Ex: FU0602130).
Please refer to the respective code for deviations.

CHARACTERISTICS

- Resistant to soot fire or moisture
- Lightweight material for fast assembly and simple offset
- Optional fixation with locking bands
- Optionally available as an oval tube, ideal for narrow and multiple chimneys
- Large variety of systems and extensive range of accessories

APPLICATION AREAS

- Standard heating appliances for oil, gas and solid fuels (natural wood, coke, peat, coal*)

* except anthracite coal from Ibbenbüren, Germany

DESCRIPTION

Single wall, pressure-tight flue gas system for condensing boilers with internal gasket

MATERIAL

1.4404 (316L) / 1.4571 (316Ti)
Others on request

FINISHING

Matt

WALL THICKNESS

0.6 mm
Others on request

INSIDE DIAMETER

80 - 600 mm
Others on request up to 1200 mm

INSULATION

Insulating shells available as an option

CONNECTION

Socket / bead with internal special gasket, when used as a connection pipe a locking band is needed

GASKET

The supplied gasket varies depending on the diameter (EPDM up to 120 °C or silicone up to 200 °C). All possible options can be found in the table on the next page. The prices of the variants not listed in the price list are available upon request.

ORDER CODE

When ordering, please replace the placeholder " ..." in the article code with the letter for the desired gasket (Standard gasket varies depending on Ø, see table).

CHARACTERISTICS

- Pressure-tight
- Moisture resistant
- Lightweight material for fast assembly and simple offset
- Optional fixing with locking bands
- Large variety of systems and extensive range of accessories

APPLICATION AREAS

- Standard heating appliances for oil and gas
- Condensing boilers

DESCRIPTION

The Jeremias EW-SILVER system is suitable for cross-sectional reductions in chimneys to adapt to modern fireplaces (oil/gas/chip/split logs and wood pellets according to DIN 51731, for dry and condensing operation mode)

MATERIAL

1.4539 (904L) only for components in contact with flue gas

FINISHING

Matt

WALL THICKNESS

0.6 mm

Others on request

INSIDE DIAMETER

80 - 300 mm

Others on request

INSULATION

Insulating shells available as an option

CONNECTION

Socket / bead

ORDER CODE

The article code for your order results from:

Article code + Ø (Ex: 617-FU0602130).

Please refer to the respective code for deviations.

CHARACTERISTICS

- Resistant to soot fire or moisture
- Lightweight material for fast assembly and simple offset
- Optional fixation with locking bands
- Optionally available as an oval tube, ideal for narrow and multiple chimneys
- Large variety of systems and extensive range of accessories

APPLICATION AREAS

- Standard heating appliances for oil and gas
- Natural wood pellets, chips and logs made from natural wood

APPROVAL NUMBER

Z - 7.1 - 3374

CLASSIFICATIONS TO DIN V 18160 - 1

T400 - N1 - W2¹⁾ - G50 - L00

T600 - N1 - W2¹⁾ - G100 - L00

¹⁾ for wood pellets made from natural wood
for wood chips made from natural wood
for natural firewood
for gas and fuel oil EL

• *1 Extension of the sliding nozzle. Price per cm

Condensate collector with drain l=250mm and 1/2" threaded nipple

Closing cap plastic for drain 1/2" (up to 200°C)

Condensate collector with drain l=250mm 1/2" threaded nipple towards bottom

Inspection length with lid 210x140mm (up to 600°C/N1)

Inspection length with box and lid 210x140mm (up to 600°C/N1)

Inspection length with round opening (up to 600°C/ N1)

Stainless steel chimney door 210x140mm without holes and 4 side lugs, incl. door key

System EW-LINE FLEX FU

DESCRIPTION

Single wall, flexible flue system made of stainless steel for renovation existing domestic chimneys with offset

MATERIAL

1.4404 (316L)

1.4539 (904L) possible for a 100% surcharge
(only two layers, wall thickness 0.18 mm, no DIBt-SILVER approval)

FINISHING

Matt

WALL THICKNESS

0.6 mm (rigid inner tubes EW-FU)

0.08 mm (Flex single layer)

0.16 mm (Flex double layer)

Others on request

INSIDE DIAMETER

80 - 250 mm, others on request up to 400 mm

CONNECTION

Socket / bead

ORDER CODE

The article code for your order results from:

Article code + Ø (Ex: FU0616110).

Please refer to the respective code for deviations.

DELIVERY

The system contains bulky items that may incur additional freight costs.

CHARACTERISTICS

- Simple installation without breaking open shaft for offsets
- Resistant to soot fire or moisture
- Smooth inner wall on double layer version
- Compatible with basic parts from System EW-FU

APPLICATION AREAS

- Standard heating appliances for oil, gas and solid fuels (natural wood, coke, peat, coal*)

* except anthracite coal from Ibbenbühren, Germany

System EW-LINE FLEX AL

DESCRIPTION

Single wall, flexible and pressure-tight flue system made of stainless steel for the renovation of existing domestic chimneys with offset

MATERIAL

1.4404 (316L)

1.4539 (904L) possible for a 100% surcharge

(only two layers, wall thickness 0.18 mm, no DIBt-SILVER approval)

FINISHING

Matt

WALL THICKNESS

0.6 mm (rigid inner tubes)

0.08 mm (Flex single layer)

0.16 mm (Flex double layer)

Others on request

INSIDE DIAMETER

80 - 250 mm, others on request up to 400 mm (flexible pipes)

CONNECTION

Socket / bead with special internal gasket and approved sealing material for the flex connection

GASKET

The supplied gasket varies depending on the diameter (EPDM up to 120 °C or silicone up to 200 °C). All possible options can be found in the table on the next page.

The prices of the variants not listed in the price list are available upon request.

ORDER CODE

When ordering, please replace the placeholder "..." in the article code with the letter for the desired gasket (Standard gasket varies depending on Ø, see table).

DELIVERY

The system contains bulky items that may incur additional freight costs.

CHARACTERISTICS

- Pressure tight
- Simple installation without breaking open shaft for offsets
- Moisture resistant
- Smooth inner wall on double-layer version
- Compatible with basic parts from System EW-AL-BI

APPLICATION AREAS

- Standard heating appliances for oil and gas
- Condensing boilers

DESCRIPTION

Single-wall, stainless steel chimney without gaskets for all standard heating appliances and combustion engines (combined heat & power units) with conically sealed connection

MATERIAL

1.4404 (316L) / 1.4571 (316Ti)

FINISHING

Material thickness 0.6 mm highly polished / from Ø 350 mm matt
Material thickness 0.8 mm matt
Others on request

WALL THICKNESS

0.6 mm
Optional for all Ø 1.0 mm matt

INSIDE DIAMETER

80 - 600 mm
Others on request up to 1000 mm

CONNECTION

Conical connection technology
Socket / bead and locking band (optional)

ORDER CODE

The article code for your order results from:
Article code + Ø (Ex: KL06222130).
Please refer to the respective code for deviations.

The appropriate amount of KL paste is automatically supplied with the order. See the table at the end of this section for an approximate amount of paste needed.

CHARACTERISTICS

- Metal conical gasket
- Pressure tight up to 5000 Pa without flanges and separate gasket
- KLK straight pipe elements that can be conically shortened
- Quick, easy installation
- Resistant to soot fire or moisture

APPLICATION AREAS

- Standard heating appliances for oil, gas and solid fuels (natural wood, coke, peat, coal*)
- Condensing boilers
- Ventilation systems
- Ovens
- CHP, combustion engines
- Emergency power generators, generators

* except anthracite coal from Ibbenbüren, Germany

DESCRIPTION

Single wall, pressure-tight flue system made of plastic

MATERIAL

PP = Polypropylene

WALL THICKNESS

2.0 mm

INSIDE DIAMETER

60 - 250 mm

Others on request

CONNECTION

Socket / bead with internal EPDM gasket

GASKET

Included in the scope of delivery

ORDER CODE

The article code for your order results from:

Article code + Ø (Ex: PP125080).

Please refer to the respective code for deviations.

CHARACTERISTICS

- Adapted boiler connections enable connection to all common boiler types
- Annular gap between inner liner and shaft can be used for air supply
- Moisture resistant
- Suitable for use up to 5000 Pa (up to Ø <200 mm)

APPLICATION AREAS

- Condensing boilers
- CHP
- Gas-operated heat pumps

CE MARK NUMBER

0036 CPR 9174 043

CE CLASSIFICATIONS ACC. TO DIN EN 14471

System EW-PP FLEX

DESCRIPTION

Single wall, flexible and pressure-tight flue system made of plastic

MATERIAL

PP = Polypropylene

WALL THICKNESS

1.0 mm up to Ø 80 mm,
1.2 mm ab Ø 100 mm
Optional: 2.0 mm rigid

INSIDE DIAMETER

60 - 160 mm

CONNECTION

Socket / bead with internal EPDM gasket

GASKET

Included in the scope of delivery

ORDER CODE

The article code for your order results from:

Article code + Ø (Ex: PPFLEX30100).

Please refer to the respective code for deviations.

DELIVERY

The system contains bulky items that may incur additional freight costs.

CHARACTERISTICS

- Adapted boiler connections enable connection to all standard boiler types
- Annular gap between liner and shaft can be used for air supply
- Resistant to moisture
- Can be used up to 5000 Pa (up to Ø 110 mm)

APPLICATION AREAS

- Condensing boilers
- CHP
- Gas-operated heat pumps

CE MARK NUMBER

0036 CPR 9174 043

CE CLASSIFICATIONS ACC. TO DIN EN 14471

Overview

CONCENTRIC EXHAUS SYSTEMS

Our concentric exhaust systems made of stainless steel or polypropylene use the annular gap between the outer and inner pipes for the supply air and thus enable modern fireplaces to be operated independently of the room air.

THE TWIN GAS FLUE SYSTEMS FROM JEREMIAS ARE CHARACTERIZED BY:

- CE certification
- Simple assembly thanks to precisely fitting elements and plug-in connections
- Stainless steel: TIG gas-shielded welded and passivated longitudinal seams for maximum corrosion resistance
- Polypropylene (PP): heating element butt-welded seam in accordance with DVS 2207 T11
- Condensate and gas-tight
- Use of high-quality sealing materials for a long service life
- Other diameters, materials, surfaces and designs are available on request

RETURN OF GOODS

We take back undamaged and packaged goods

Goods can only be returned with a return delivery bill

We charge a 25% restocking fee for TWIN systems

The following are excluded from returns

- Custom-made products
- Copper
- Matt
- TWIN-P from Ø 125 / 190 mm
- Roof ducts
- Ceiling panels with exact °number

System TWIN-GAS

DESCRIPTION

Concentric stainless steel flue pipe for room-air independent heating appliances

MATERIAL

Inside: 1.4404 (316L)
Outside: 1.4301 (304)

FINISHING

Highly polished

WALL THICKNESS

Inside: 0.5 mm
Outside: 0.5 mm

DIAMETER

100/50 mm and 130/200 mm

CONNECTION

Socket / bead with special internal, glued-in gasket in the outer tube

LOCKING BAND/GASKET

Included in the standard scope of delivery of every straight pipe element

SYSTEM CERTIFICATION

The Jeremias exhaust system TWIN-GAS is already available from many manufacturers of decorative gas fireplaces and gas stoves with their devices system certified and only approved in this combination.

System certifications currently exist with: Glen Dimplex (Faber Chimneys), Bellfires (formerly Interfocus), Element4, Ortal, STUV, Attika, Rais, Camina Schmid, Max Blank, Hoxter, Metalfire

ORDER CODE

The article code for your order results from:

Article code + Ø (Ex: TWG14100/150).

Please refer to the respective code for deviations.

CHARACTERISTICS

- Moisture resistant
- Pressure-tight outer tube through glued silicon gasket
- This prevents exchange with room air in the installation room

APPLICATION AREAS

- Decorative gas fireplaces

Connecting pipe TWIN-GAS-VISION

CONNECTING PIPE TWIN-GAS-VISION

The TWIN-GAS-VISION design system is the ideal solution for a visible connection pipe between the gas stove and the chimney. The black painted (Senotherm 708.123) elements with retracted plug-in ends do not require any locking bands for a stable connection and, with their smooth tubular column, ensure elegance in the living area.

System TWIN-PL

DESCRIPTION

Concentric, pressure-tight connecting pipe for use inside the building with plastic inner tube and elo-galvanized outer tube for room air-independent heating appliances

MATERIAL

Inside: PP (Polypropylene)
Outside: Galvanized, powder-coated

FINISHING

White, powder-coated (RAL9016)
(Replacement paint for touch up, Code: LACK-DOSE, € 17.00 net per 400 ml can)

WALL THICKNESS

Inside: 2.0 mm
Outside: 0.5 - 0.6 mm

DIAMETER

60/100 mm, 80/125 mm, 100/150 mm
and 110/160 mm

CONNECTION

Socket / bead with internal special gasket in the exhaust pipe and in the outer pipe

LOCKING BAND / GASKET

Gasket is pre-assembled in the inner and outer tube
No locking band

ORDER CODE

The article code for your order results from:
Article code + Ø (Ex: TWPL10060/100 or TW26150).
Please refer to the respective code for deviations.

CHARACTERISTICS

- Connection of boiler systems for room-air independent heating appliances on concentric or single wall chimney systems
- Combination with TWIN-P, EW-PPS, EW-PP-FLEX possible
- Use of the fireplace as a roof heating center is possible

APPLICATION AREAS

- Flue gas system for room air-independent operation
- Condensing boilers
- CHP
- Gas-powered heat pumps
- Fuel cells
- Use inside the building

System TWIN-PL MULTIPLE OCCUPANCY / CASCADE

We speak of cascades when several fireplaces are connected to one another in a boiler room and the flue gases from all connections are routed to the outside with one flue gas system.

As a rule, cascades are operated one after the other or are coordinated with one another. Connecting multiple modules together allows for better performance as each connected boiler performs separate tasks. If one device fails, another can take over the output and the heating operation does not have to be stopped. Cascade controls are often installed in apartment buildings or large commercial properties because they are characterized by their efficient heating.

With the concentric flue gas systems TWIN-PL and TWIN-P as well as the single wall plastic systems EW-PPS and EW-PP-FLEX, Jeremias also offers the right solution for many construction variants for cascade arrangements of boilers.

System TWIN-P

DESCRIPTION

Concentric, pressure-tight flue pipe with plastic inner tube and stainless steel outer tube for room-air independent heating appliances

MATERIAL

Inside: PP (Polypropylene)
Outside: from Ø 60/100 mm: 1.4509 (441)
from Ø 125/190 mm: 1.4301 (304)

FINISHING

Highly polished
On request:
- powder-coated + 55% (version TW-P)
- matt + 25%, brushed + 25%, copper length elements + 110%,
copper fittings + 95% (version TW-PV)

With the TW-PV version, starting from the joint in front of the last bracket, every joint must be secured with a locking band (TWPV45Ø - to be ordered separately)!
Replacement paint for touch up, Code: LACK-DOSE, € 17.00 net per 400 ml can

WALL THICKNESS

Inside: 2.0 mm
Outside: 0.5 mm

DIAMETER

60/100 mm, 80/125 mm, 100/150 mm and 110/160 mm
Extended diameters from 125/190 mm, 160/230 mm, 200/265 mm and 250/315 mm

CONNECTION

Socket / bead with internal special gasket in the exhaust pipe, no bead in the outer pipe.
Version TW-PV: retracted plug connection

LOCKING BAND / GASKET

Gasket for the inner tube is included in the standard scope of delivery. When installed as a connecting pipe in the boiler room, each joint needs an external gasket with locking band TW1490. Extended diameters including locking band.

ORDER CODE

The article code for your order results from: Article code + Ø (e.g.: TWP10060/100 or TW26150).
Please refer to the respective code for deviations.

TWIN-P

CHARACTERISTICS

- Connection of boiler systems in room air independent operation on concentric or single-walled exhaust systems
- Combination with TWIN-PL, EW-PPS and EW-PP FLEX possible
- Use of the fireplace as a roof heating center is possible
- Mounting in the riser without a clamp (TWP45 clamping straps optionally available on request)

APPLICATION AREASS

- For room-air independent heating appliances
- Condensing boilers
- CHP
- Gas-powered heat pumps
- Fuel cells
- Use inside and outside the building

System TWIN-P

MULTIPLE OCCUPANCY / CASCADE

The connection of several fireplaces to a common flue gas system is referred to as multiple occupancy. The devices can be operated independently of each other. This is becoming more and more common in apartment buildings or in single-family houses with several fireplaces on different floors.

In order to comply with all requirements and approvals, a few points must be observed before installation and the cross-section of the exhaust system in question must be calculated.

For example, the devices must not obstruct each other or push the exhaust gases from the lower system to the next higher floor. A mixed occupancy, i.e. different fuels for the individual fireplaces, is permitted as long as the requirements of the DIN standards are met. The fireplaces that can be used are marked with a note to allow multiple occupancy. In principle, each multiple occupancy should be checked very carefully and clarified with the chimney sweep.

With the concentric flue gas systems TWIN-PL and TWIN-P as well as the relining systems EW-PPS and EW-PP-FLEX, multiple assignments can be implemented for all conceivable starting situations.

DOUBLE WALL CHIMNEY SYSTEMS

At a glance

DOUBLE-WALL CHIMNEY SYSTEMS

Our double wall chimney system made of stainless steel are equipped with high-quality insulating material and are primarily installed as external chimney systems. Available in different designs, materials and colour options, they are a real eye-catchers that enhance the appearance of the building.

The product range includes system solutions for every conceivable flue gas generator and application as well as a selection of special designs.

JEREMIAS DOUBLE-WALL CHIMNEY SYSTEMS HAVE THE FOLLOWING CHARACTERISTICS:

- CE certification
- Simple assembly thanks to precisely fitting elements and plug connections
- No welding required on the construction site
- High quality insulation to avoid thermal bridges between the inner and outer shell
- Stainless steel: TIG inert gas welded and passivated longitudinal seams for the highest possible level of protection against corrosion
- Condensate and gas tight
- Use of high quality sealing materials for a long service life
- Many other diameters, materials and designs are available on request

SURCHARGES FOR DIFFERENT DESIGNS

MATERIAL

- 1.4539 Resistant to condensate acid up to 600 °C
- 1.4828 operating temperature up to 1000 °C, price on request
- Others on request

OUTER TUBE

- Copper + 65% (DW-FU); When changing from DW-FU to copper, you need the DW1607 transition Copper is only available in Ø 80, 100, 115, 130, 150, 160, 180, 200, 225, 250 and 300 mm
- Brushed finish +15% (DW-FU, DW-KL)
- Matt finish +15% (DW-ECO 2.0, DW-FU, DW-KL)
- Painted finish Reduced discount (see condition agreement) (DW-ECO 2.0, DW-FU, DW-KL, DW-VISION und DW-MAMMUT)

WALL THICKNESS (DW-FU and DW-KL)

- Inner tube 0,8 mm +10%
- Inner tube 1,0 mm +15%
- Insulation 50 mm +25%

RETURN OF GOODS

- We accept the return of undamaged packaged goods up to a diameter of 250 mm, for DW-KL only Ø 150 and Ø 180 mm.
- A return of goods is only possible with a return delivery note
- For double-wall systems, we charge a return fee of 25%
- The following are excluded from taking back:
 - Custom-made products, Copper, RAL, mat, brushed
 - Wall thickness 0,8 mm, 1,0 mm, insulation 50 mm
 - Material 1.4539 and 1.4828
 - DW-FU mat or brushed
 - Roof penetrations
 - Ceiling plates with exact ° number
 - DW-KH
 - Components with glued-in seal

IMPORTANT INFORMATION

XX

The distances from flammable components are dependent on diameter. We therefore refer you to our declarations of performance available for download on our homepage.

When ordering chimneys without a base (e.g. with pipe bend and support leg or base plate for intermediate support), please note that a locking band must usually be ordered as well.

Matt

Brushed

Highly polished

Copper

powder-coated

DESCRIPTION

Double wall chimney system made of stainless steel

MATERIAL

Inside: 1.4571 (316Ti) / 1.4404 (316L)
Outside: 1.4301 (304)
Others on request

FINISHING

Highly polished
Optional: matt + 15%, painted: reduced discount (see condition agreement), brushed + 15%, copper + 80%.
When changing from DW-FU to copper, you need the transition DW1607.
(Replacement paint for touch up must be ordered separately.
Code: LACK-DOSE, € 17.00 net per 400 ml can)

WALL THICKNESS

Inside / Outside each 0.6 mm
Others on request

INSIDE DIAMETER

80 - 600 mm
Others on request up to 1200 mm
Copper in only available in Ø 80, 100, 115, 130, 150, 160, 180, 200, 225, 250 and 300 mm

INSULATION

Mineral insulation 32.5 mm thick, 50 mm insulation available subject to a surcharge

CONNECTION

Socket / bead with locking band

LOCKING BAND

Included. For a setup without a T-connection, an extra locking band must be ordered for the chimney top.

ORDER CODE

The article code for your order results from:
Article code + Ø (Example: DW05250)
Please refer to the respective code for deviations.

CHARACTERISTICS

- Versatile exhaust system
- High flexibility, perfect also for difficult installation situations
- Resistant to soot fire or moisture

APPLICATION AREAS

- Standard heating appliances for oil, gas and solid fuels (natural wood, coke, peat, coal*)
- * except anthracite coal from Ibbenbüren, Germany

- *1 A clamping band DW41 must be ordered for directly mounted chimneys
- *2 Also available with a square insert on request
- *3 For the weight of the draft controller of approx. 28 kg, a separate anchorage has to be provided!
- *4 Only suitable for mounting with a cantilever
- *5 Use in coordination with the authorized district chimney sweep.

Inspection length with soot safety door (up to 600°C/N1)

Inspection length (up to 600°C/N1) with square door 210x140mm and blind lid

Inspection length with integrated base plate and condensate drain at bottom (up to 600°C/N1)

Inspection length Design Plus, indoors only (up to 600°C/N1)

Inspection length Design Plus, outdoors (up to 600°C/N1)

Inspection length Design Plus with backstop above inspection and removable soot collector (up to 600°C/N1)

Inspection length Design, backstop and wall sleeve for FERRO, 120mm insert/Soot tray removable (up to 600°C/N1)

•*1 Please note the correct assembly according to our assembly instructions „free cantilever height up to 5 m“.

•*2 Use in coordination with the authorized district chimney sweep.

Inspection length for oil or gas, for horizontal use (up to 400°C/N1)

Inspection length for solid fuels (up to 600°C/N1)

Inspection length with inner and outer door (up to 600°C/N1)

Length 1000mm double female incl. 2 clamping bands

Wall bracket 50mm

Adjustable wall bracket 50-150mm, single-braced

Wall bracket adjustable 50-150mm, double-braced

PRODUCT SOLUTIONS FOR THE NEW DISCHARGE CONDITIONS

All components in this price list with the BlmSchV reference have been specially developed with structural solutions to meet the new discharge requirements.

On our website, in the special “New discharge conditions”, we not only provide detailed information on the topic, but also a condensed article overview of all relevant components for you to [download](#).

*1 When ordering, please specify the system diameter and distance from the wall!

DESCRIPTION

Double wall, pressure-tight stainless steel chimney

MATERIAL

Inside: 1.4404 (316L) / 1.4571 (316Ti)

Outside: 1.4301 (304)

Others on request

FINISHING

Highly polished

Optional: matt + 15%, painted: reduced discount (see condition agreement), brushed + 15%, cooper + 80%

When changing from DW-FU to copper, special adaptor DW1607 is needed.

(Replacement paint for touch up must be specifically ordered:

Code: LACK-DOSE, € 17.00 net per 400 ml can)

WALL THICKNESS

Inside / Outside each 0.6 mm

Others on request

INSIDE DIAMETER

80 - 600 mm

Others on request up to 1200 mm

Copper is only available in Ø 80, 100, 115, 130, 150, 160, 180, 200, 225, 250 and 300 mm

INSULATION

Mineral insulation 32.5 mm thick, 50 mm insulation available subject to a surcharge

CONNECTION

Socket/bead plug-and-socket connection with special internal gasket and external locking band

LOCKING BAND

Included. For an assembly without T-connection, an additional locking band must be ordered for the chimney top.

GASKET

The gasket supplied varies depending on the diameter (EPDM up to 120°C or silicone up to 200°C). All possible options can be found from the table on the next page. The prices of variants not listed in the price list are available on request.

The actual price charged for components incl. gasket may differ from the price stated here, as there may be minimal differences depending on your individual discount composition of DW discount (component) and FU discount (gasket).

ORDER CODE

When ordering, please replace the placeholder “...” in the article code with the letter for the desired gasket (Standard gasket varies depending on Ø, see table).

CHARACTERISTICS

- DW-FU basic parts are made positive pressure tight by insertion of a gasket in a moulded bead
- Additional special DW-AL supplementary components available
- Moisture resistant

APPLICATION AREAS

- Standard heating appliances for oil and gas
- Condensing boilers

System DW-SILVER

DESCRIPTION

DW-SILVER is suitable for connecting fireplaces for gas, EL heating oil, wood pellets, wood chips and logs for both dry and wet operation

MATERIAL

Inside: 1.4539 (904L) only for components in contact with flue gas

Outside: 1.4301 (304)

Others on request

FINISHING

Highly polished

WALL THICKNESS

Inside / Outside each 0.6 mm

Others on request

INSIDE DIAMETER

80 - 300 mm

Others on request up to 1200 mm

INSULATION

Mineral insulation 32.5 mm thick, 50 mm insulation available subject to a surcharge

CONNECTION

Socket / bead with locking band

LOCKING BAND

Included. For a setup without a T-connection, an extra locking band must be ordered for the chimney top.

ORDER CODE

The article code for your order results from:

Article code + Ø (Example: 301-DWØ3080).

Please refer to the respective code for deviations.

CHARACTERISTICS

- Resistant to soot fire or moisture
- Particularly suitable for discharging flue gases from the combustion of pellets or wood chips in condensing operation
- Versatile exhaust system
- High flexibility, perfect also for difficult installation situations

APPLICATION AREAS

- Standard heating applications for oil and gas
- Natural wood pellets, chips and logs made from natural wood

CERTIFICATE NUMBER

Z - 7.1 - 3375

CE-CLASSIFICATIONS ACC. TO DIN EN 18160 - 1

T600 - N1 - W2¹⁾ - G50 - L00

¹⁾ for wood pellets made from natural wood
for wood chips made from natural wood
for natural firewood
for gas and fuel oil EL

PRODUCT SOLUTIONS FOR THE NEW DISCHARGE CONDITIONS

All components in this price list with the BlmSchV reference have been specially developed with structural solutions to meet the new discharge requirements.

On our website, in the special "New discharge conditions", we not only provide you with detailed information on the topic, but also a condensed article overview of all relevant components for you to [download](#).

*1 When ordering, please specify the system diameter and distance from the wall!

System DW-ECO 2.0

DESCRIPTION

Double wall system made of stainless steel for all standard fireplaces in negative pressure operation, in dry or wet operation

MATERIAL

Inside: L99

Outside: 1.4301 (304)

FINISHING

Highly polished

Optional: matt + 15%, painted

(Replacement paint for touch up must be ordered separately.)

Code: LACK-DOSE, € 17.00 net per 400 ml can)

WALL THICKNESS

Inside / Outside each 0.5 mm

INSIDE DIAMETER

130 - 600 mm

Others on request from 80 mm

INSULATION

Mineral insulation 25 mm thick

CONNECTION

Socket / bead plug-and-socket connection with locking band

LOCKING BAND

Included

For an assembly without T-connection, an additional locking band must be ordered for the chimney top.

ORDER CODE

The article code for your order results from:

Article code + Ø (Example: DWETN13200).

Please refer to the respective code for deviations.

CHARACTERISTICS

- Low-cost alternative to double wall system DW-FU
- 70 mm wide, recessed locking band
- Resistant to soot fires and moisture

APPLICATION AREAS

- Standard fireplaces / heating appliances for oil, gas and solid fuels (natural wood, coke, peat, coal*)

* except anthracite coal from Ibbenbüren, Germany

PRODUCT SOLUTIONS FOR THE NEW DISCHARGE CONDITIONS

All components in this price list with the BlmSchV reference have been specially developed with structural solutions to meet the new discharge requirements.

On our website, in the special “New discharge conditions”, we not only provide detailed information on the topic, but also a condensed article overview of all relevant components for you to [download](#).

§ 19
BlmSchV

System DW-ECO 2.0 AL

DESCRIPTION

Double wall, pressure-tight system made of stainless steel

MATERIAL

Inside: L99

Outside: 1.4301 (304)

Others on request

FINISHING

Highly polished

Optional: matt + 15%

WALL THICKNESS

Inside / Outside each 0.5 mm

Others on request

INSIDE DIAMETER

130 - 600 mm

Others on request from 80 mm

INSULATION

Mineral insulation 25 mm thick

CONNECTION

Socket / bead plug-and-socket connection with special internal gasket and external locking band

LOCKING BAND

Included

For an assembly without T-connection, an additional locking band must be ordered for the chimney top.

GASKET

The gasket supplied varies depending on the diameter (EPDM up to 120°C or silicone up to 200°C). All possible options can be found from the table on the next page. The prices of variants not listed in the price list are available on request.

The actual price charged for components incl. gasket may differ from the price stated here, as there may be minimal differences depending on your individual discount composition of DW discount (component) and FU discount (gasket).

ORDER CODE

When ordering, please replace the placeholder "..." in the article code with the letter for the desired gasket (Standard gasket varies depending on Ø, see table).

CHARACTERISTICS

- DW-ECO 2.0 base parts are made pressure-tight by inserting a gasket in a molded bead
- Low-cost alternative to double wall system DW-AL
- 70 mm wide, recessed locking band
- Moisture resistant

APPLICATION AREAS

- Standard heating appliances for oil and gas
- Condensing boilers

CALCULATION OF THE MAXIMUM WALL DISTANCE OF WALL SUPPORT AND CROSS BEAM FOR THE SYSTEM DW-ECO 2.0 AL

Total length of the wall support 350 mm Total length of the wall support 500 mm Total length of the wall support 750 mm Total length of the wall support 1030 mm Component length (e.g. 350 mm Typ I) - 15 mm - (Ø inside + 50 mm) = max. wall distance

System DW-BLACK

DESCRIPTION

Black matt powder-coated double wall system made of stainless steel for all standard fireplaces in negative pressure operation, in dry or wet operation

MATERIAL

Inside: L99

Outside: Elo-galvanized

FINISHING

Black matt powder-coated (RAL 9011MB)

Colours:

DW-GREY (RAL 7016M)

DW-WHITE (RAL 9010M)

WALL THICKNESS

Inside / outside each 0.5 mm

INSIDE DIAMETER

130 - 200 mm

Others on request from 80 mm

INSULATION

Mineral insulation with 25 mm thickness

CONNECTION

Plug connection socket / bead with clamping band

LOCKING BAND

Included

ORDER CODE

The article code for your order results from:

Article code + Ø (Ex: 16-290-DWETN05130).

Please refer to the respective code for deviations. If you require different colors, please use the following article codes instead of 16-290-DWETN05...(black):

28-290-DWETN05... DW-GREY

47-290-DWETN05... DW-WHITE

DW-BLACK

CHARACTERISTICS

- Inexpensive black matt powder-coated exhaust system
- 70 mm wide, recessed locking band
- Resistant to soot fire or moisture

APPLICATION AREAS

- Standard fireplaces for oil, gas and solid fuels (natural wood, coke, peat, coal*)

* excluding anthracite coal from Ibbenbüren, Germany

DESCRIPTION

Double wall, pressure-tight stainless steel system with conically sealed connection

MATERIAL

Inside: 1.4404 (316L) / 1.4571 (316Ti)

Optional: 1.4828 (309)

Outside: 1.4301 (304)

FINISHING

Highly polished

Optional: matt + 15%, painted: reduced discount (see condition agreement), brushed + 15%.

(Replacement paint for touch up must be specifically ordered:

Code: LACK-DOSE, € 17.00 net per 400 ml can)

WALL THICKNESS

Inside / Outside each 0.6 mm

Others on request

INSIDE DIAMETER

80 - 600 mm

Others on request up to 1000 mm

INSULATION

Mineral insulation 32.5 mm thick

50 mm insulation available subject to a surcharge

CONNECTION

Conical connection technique

LOCKING BAND

Included

ORDER CODE

The article code for your order results from: Article code + Ø (Ex: DWKL03180).

Please refer to the respective code for deviations.

The appropriate amount of KL paste is automatically supplied with the order.

See the table at the end of this section for an approximate amount of paste needed.

CHARACTERISTICS

- Conical metal surface gasket
- Conical cuttable length elements available
- Pressure tight up to 5000 Pa without flanges and separate gasket
- Also suitable for high temperatures
- Resistant to soot fires and moisture

APPLICATION AREAS

- Standard heating appliances for oil, gas and solid fuels (natural wood, coke, peat, coal*)
- Condensing boilers
- Ventilation systems
- Baking ovens
- CHP, emergency power generators

* except anthracite coal from Ibbenbüren, Germany

System DW-KL CONNECTING LINE DW-KH

CONNECTING LINE - SECURITY SET

Especially in tight installation situations or with large diameters, knocking DW-KL system elements together in the connecting line is not always easy. We therefore offer you special DW-KH system elements that enable easy force-locking of the conical plug connection using a pre-assembled locking set. To do this, the locking hook of one element is simply placed in the holder of the next element and the connection is then tightened with a wrench so that the elements slide into one another bit by bit. Done!

1.) HOOK IN PRE-ASSEMBLED SAFETY SET
for conical plug connection

2.) CREATE FRICTIONAL CONNECTION
by screwing

DESCRIPTION

The designer chimney: Double wall design chimney system made of stainless steel with a smooth tubular column and without locking bands

MATERIAL

Inside: 1.4404 (316L) / 1.4571 (316Ti)

Outside: 1.4301 (304)

Others on request

FINISHING

Brushed

Highly polished: on request,

Painted: reduced discount (see condition agreement)

(Replacement paint for touch up must be ordered separately:

Code: LACK-DOSE, € 17.00 net per 400 ml can)

WALL THICKNESS

Inside / Outside each 0.6 mm

Others on request

INSIDE DIAMETER

130 - 300 mm

INSULATION

Mineral insulation 32.5 mm thick

CONNECTION

Push-fit connection (outer pipe)

ORDER CODE

The article code for your order results from:

Article code + Ø (Example: DWV262180).

Please refer to the respective code for deviations.

CHARACTERISTICS

- Elegant design with a smooth tubular column and brushed finish
- Cylindrical slip-on connector ends on the outer pipe eliminate the need for locking bands
- Resistant to soot fire or moisture

APPLICATION AREAS

- Standard fireplaces for oil, gas and solid fuels (natural wood, coke, peat, coal *)

* except anthracite coal from Ibbenbüren, Germany

System DW-VISION

Condensate collection bucket

Round base plate and drain and adjustable wall bracket up to 200mm (max. installation height 8m)

Base plate with condensate drain at the bottom and 1/2" nipple

Base plate with condensate side drain and 1/2" nipple

Base plate for mounting on a bracket with side drain and 1/2" threaded nipple

Base plate with removable soot collector

Base plate for intermediate support

System DW-POWER 2.0

DESCRIPTION

Double wall, pressure-tight stainless steel exhaust system with gaskets in the outer casing, which allow stress-free thermal expansion of the inner tube hence no compensators needed

MATERIAL

Inside: 1.4404 (316L)

Outside: 1.4301 (304)

FINISHING

Highly polished

Optional: matt

WALL THICKNESS

Inside: 0.5 mm

Outside: 0.6 mm

INSIDE DIAMETER

100 - 600 mm

INSULATION

Mineral insulation 57.5 mm thick

CONNECTION

Push-fit connection (outer pipe)

LOCKING BAND

Included

ORDER CODE

The article code for your order results from:

System + article code + Ø (e.g.: DWPW05250)

CHARACTERISTICS

- Easy to install and disassemble
- For high temperatures up to 600°C
- Pressure-tight up to 5000 Pa
- Saltwater-resistant components (available for an additional charge)
- Gaskets in the outer casing
- Stress-free thermal expansion of the inner tube possible
- Not suitable for condensing operation
- Not suitable for condensing operation (e.g. CHP)

APPLICATION AREAS

- Gas and diesel generators (without heat exchanger)
- Emergency generators / emergency power systems
- Industrial processes

LIGHTWEIGHT SHAFTS AND FIRE PROTECTION WALL DUCTS

LIGHTWEIGHT SHAFT

Jeremias-FURADO is a space-saving, lightweight shaft system for new buildings and renovations. The shaft is thermally pretreated according to DIN 18160 Part 60, meets all the requirements from the latest test criteria and offers different liner solutions for connection to various types of fireplaces.

For solid fuel fireplaces, we recommend using our FURADO-F system or the system FURADO-F-LAS for room air-independent operation. When operating an oil or gas fireplace, FURADO-A or the space-saving system FURADO-LA30 are the first choice. Alternatively, a triangular version of the shaft elements is available.

FIRE PROTECTION DUCTS

LUX-NOVA and LUX-ECO are available as penetrations for wall, ceiling and roof

THE LIGHTWEIGHT SHAFT SYSTEMS OF JEREMIAS ARE CHARACTERIZED BY:

- CE-Certification
 - Safest connection technology by shiplap connection (or plug connector FURADO-A-LA30)
 - Great variability: different shafts and inner pipe solutions for different types of fireplaces
 - Easy to handle and ready for installation System
 - Low weight of the shaft elements (only 300kg/m³)
 - Moisture resistant shaft material
 - Very good insulating properties
 - Optional available as triangular shaft
-

RETURN OF GOODS

- Lightweight Shafts and Fire Protection Ducts cannot be returned!

NOTE

XX
The distances from flammable components are dependent on diameter.
We therefore refer you to our declarations of performance available for download on our homepage.

If the height of your chimney exceeds approx. 5 m, please order additional 250 mm, 500 mm and 1000 mm straight pipe elements because the shafts are longer than our liners
Effective length shaft elements: 250 = 225 mm / 500 = 475 mm / 1000 = 975 mm
Effective length inner tube: 250 = 190 mm / 500 = 440 mm / 1000 = 940 mm

System FURADO-F

DESCRIPTION

Shaft system consisting of calcium silicate fire protection panels with Jeremias liners and 25 mm insulating shells.

Version over roof with system DW-ECO 2.0, DW-FU or shaft with cladding possible.

Alternative

Assembly shaft for installing CE-certified liners and min. 25 mm insulating shells

MATERIAL

Calcium silicate fire protection panels

WALL THICKNESS

Standard: 50 mm (Temperature ≤ 400 °C)

Optional: 60 mm (Temperature ≤ 600 °C)

INTERIOR SHAFT DIMENSIONS

140 x 140 mm up to 360 x 360 mm

Others on request

ORDER CODE

The article code for nesting elements results from:

LS + internal dimensions + article code (e.g.: LS140x140-17)

CHARACTERISTICS

- Extremely good insulating properties
- Easy to handle and assemble due to low weight
- Secure connection technology with tongue and groove joints
- Various liner solutions and shaft cladding meet all the relevant requirements
- Minimum clearance to flammable components
- 25 m construction height of the shaft without intermediate support
- Static set for installation heights up to 3 m above roof

APPLICATION AREAS

- Standard heating applications for solid fuels (natural wood, coke, peat, coal*)
- New construction and renovation

* except anthracite coal from Ibbenbüren, Germany

System FURADO-F-LAS

DESCRIPTION

Concentric shaft system consisting of calcium silicate fire protection panels with Jeremias Inside pipe EW-FU and 25 mm insulating shells

MATERIAL

Calcium silicate fire protection panels

WALL THICKNESS

50 mm
Others on request

INTERIOR SHAFT DIMENSIONS

140 x 140 mm up to 360 x 360 mm

CHARACTERISTICS

- Extremely good insulating properties
- Easy to handle and assemble due to low weight
- Secure connection technology with tongue and groove joints
- Various liner solutions and shaft cladding meet all the relevant requirements
- Minimum clearance to flammable components
- 25 m installation height of the shaft without intermediate support
- Static set for installation heights up to 3m above roof

APPLICATION AREAS

- LAS operation with solid fuels (single occupancy)
- Standard heating applications for solid fuels (natural wood, coke, peat, coal*)
- New construction and renovation

* except anthracite coal from Ibbenbüren, Germany

LICENSE NUMBER

System FURADO-A

DESCRIPTION

Shaft system consisting of calcium silicate fire protection panels with Jeremias liners EW-KL, EW-ALBI, EW-PPS or EW-PP-FLEX, depending on the exhaust gas temperature with 25 mm insulating shells. Possible execution over the roof with shaft and cladding.

Alternative

Assembly shaft for installing CE-certified liners

MATERIAL

Calcium silicate fire protection panels

WALL THICKNESS

Standard: 60 mm (Exhaust temp. ≤ 600°C)
Optional: 50 mm (Exhaust temp. ≤ 400°C)

INTERIOR SHAFT DIMENSIONS

140 x 140 mm to 330 x 330 mm
Others on request

INSULATION

up to 160°C exhaust gas temperature without insulation
from 160°C exhaust gas temperature min. 25 mm insulation shells

ANGULAR GAP

up to 160°C at least 20 mm between the inner pipe and the inside of the shaft
from 160°C at least 20 mm between the insulation and the inside of the shaft

ORDER CODE

The article code for your order results from:
LS + internal dimensions + article code (e.g.: LS60140x140-17)

CHARACTERISTICS

- Extremely good insulation properties
- Easy to handle and assemble due to low weight
- Secure connection technology with tongue and groove joints
- Various liner solutions and shaft cladding meet all requirements
- Minimum clearance to flammable components
- 25 m installation height of the shaft without intermediate support
- Static set for installation heights up to 3 m above roof

APPLICATION AREAS

- Standard fireplaces for oil and gas
- New construction and renovation
- Condensing boilers
- CHP and combustion engines
- Gas-powered heat pumps
- Fuel cells

System FURADO-A CONSTRUCTION EXAMPLE 1

System FURADO-A CONSTRUCTION EXAMPLE 2 ROOM AIR INDEPENDENT

System FURADO-A

CONSTRUCTION EXAMPLE 3 ROOM AIR DEPENDENT

Fire protection implementation LUX-NOVA

DESCRIPTION

Variable shortenable wall, ceiling and roof duct for carrying out chimneys flues and connecting pieces

Variant 1: with pipe cut

Variant 2: without pipe cut

MATERIAL

Housing made of temperature resistant fireproof material

NOMINAL DIAMETER (DN)

Up to DN 250 mm

INSTALLATION DIMENSIONS

430 x 430 mm, 480 x 480 mm (measure B),

Length up to 496 mm (measure A)

Up to 530 x 530 mm (only LUX-NOVA variant 2)

Length up to 496 mm (measure A)

WALL THICKNESS

of penetrated walls, ceilings or roof:
up to max. 496 mm

CHARACTERISTICS

- Only 140 mm from inner tube to combustible materials
- Fast and easy installation
- Also suitable for later installations
- Can be fitted with each exhaust system (EW, DW) and each stovepipe
- Suitable for passive and low-energy houses with a special adapter rubber for vapor barrier (blower door test-capable)
- Compact ready solution
- Industrially manufactured with consistent quality fire protection
- Individual wall thicknesses and roof pitches practicable
- Length adaptable on site
- Simple and secure connection with the building structure by stable outer shell

APPLICATION

- Penetration designed for walls made of combustible materials
- Meets the requirements of the combustion regulations of German federal states and of DIN V 18160-1
- Certified for flue pipes of exhaust systems or chimneys up to temperature classification T400
- Developed for use in inside and exterior walls
- Significant reduction of the lateral distance for pipe penetrations compared to FeuVo

LICENSE NUMBER

Z - 7.4 - 3487

- *1 For single-walled pipes, please always order insulation shell FU39-25!

Please note that adhesive L69-1 is always included.

LUX-NOVA including insulation shell is also available as a SET. Ordercode:
LUX-NOVA-GP-EW...-SET

FACT-BOX LUX-NOVA Variant 1

- Quick and easy installation
- Also suitable for subsequent installation on the construction site
- Can be used with any exhaust system (stainless steel single-walled and double-walled, stove pipes)
- Tested and approved max. installation length 496 mm
- Individual wall thicknesses can be achieved
- Length can be shortened on site to 72 mm
- Simple and secure connection to the building structure thanks to stable outer cover
- All penetrations are already pre-primed so that the vapor barrier film can be attached using a sealing sleeve
- The change from double-walled to single-walled can take place within the penetration or with DW-Length element with integrated wall lining
- Individual custom-made products with length adjustment and pipe cutout can be delivered ready-made according to customer requirements (see accessories table)

Example:
LUX-NOVA with Ø pipe cutout
140 mm for EW or
210 mm for DW

Accessories: Optionally, the wall duct can be ordered with connection plate for easier connection of the on-site vapor barrier and/or the special seal and fastening to the wall

Accessories: Special seal for connection to existing vapor barrier or in combination with connection plate

Accessories: Radiation protection plate for combustible wall

Special seal for vapor barrier

When installing in a low-energy, passive or timber-frame prefabricated house, the fire protection duct must be connected to the vapor barrier film.

Depending on the outside dimensions of the duct, we offer special seals in different sizes as accessories. These are supplied together with a suitable silicone adhesive.

Together with the optionally available connection plate, a clean on-site seal can be created in order to meet the requirements of the blower door test.

FACT-BOX LUX-NOVA Variant 2

- Hole cutouts in the desired size can be made on site
- Can be used for different diameters, so little storage is required
- The hole cutout can be moved from the middle of the wall duct, provided that it is ensured that the distance from the exhaust gas-carrying inside pipe to the combustible component or to the outside dimension of the wall duct is not less than 140 mm at any point (see "the right size")
- Installation as a blind wall duct for later connection possible
- Quick and easy installation
- Also suitable for subsequent installation on the construction site
- Can be used for various exhaust systems (stainless steel single-walled and double-walled, stove pipes)
- Tested and approved for a maximum installation length of 496 mm
- Individual wall thicknesses and roof pitches can be realized (see accessories table)
- Length can be adjusted on site
- Simple and secure connection to the building structure thanks to stable outside cover
- All ducts are already pre-primed so that the vapor barrier film can be attached using a sealing sleeve
- The change from double-walled on single-walled can take place within the feedthrough or with DW-Length element with integrated wall lining
- Individual custom-made products with length adjustment, pipe cutouts and bevel cuts can be delivered ready-made according to customer requirements (see accessories table)

SPECIAL: PITCHED ROOF

When routing exhaust gases through a pitched roof, the roof pitch must be taken into account when selecting the appropriate fire protection duct. The greater the roof pitch, the greater the required length (dimension A) of the LUX-NOVA. The corresponding bevel cut as well as the elliptical pipe cut-out must be ordered from us as an additional service.

Calculation of the required component length:
 $A = (\text{outside width } B \times \tan \text{ roof pitch}) + (\text{vertical component depth } C / \sin (90^\circ \text{ roof pitch}))$

THE RIGHT SIZE

For our fire protection ducts, the minimum distance between the exhaust pipe and combustible components is 140 mm. If the pipe cutout is installed centrally, the required outside dimensions of the fire protection duct are calculated as pipe diameter + 280 mm. If the pipe cutout is eccentric, the deviation from the center point must be added accordingly. The distance must not be less than 140 mm on any side.

Please note that the minimum distances only apply to the combustible wall structure or the combustible components in the wall. The wall cladding must at least correspond to Appendix 2 - Pos. 1 of approval Z - 7.4 - 3487.

*1 Please inquire about delivery time separately.

Please note that adhesive L69-1 is always included.

LUX-NOVA including insulation shell is also available as a SET. Order code: LUX-NOVA-GP-EW...-SET

Fire protection implementation LUX-ECO

DESCRIPTION

Inexpensive wall, ceiling and roof penetration for insulated flue pipes

MATERIAL

Pipe shell made from non-combustible fiberglass insulation Variotherm

NOMINAL DIAMETER (DN)

Up to max. DN 250 mm

LENGTHS

500 mm or 1000 mm, can be shortened to the desired installation length

WALL THICKNESS

Up to max. 360 mm

CEILING THICKNESS

Up to max. 500 mm

CHARACTERISTICS

- Approved for the implementation of insulated flue pipes, connecting pipes and chimneys
- Max. flue gas temperature 400°C (T400)
- Significant reduction in the lateral distance for flue pipe penetrations compared to FeuVo
- Particularly practical for pitched roofs and buildings with external insulation

PARTICULARITIES

- Only 125 mm distance from the stovepipe components to combustible materials
- Max. length when used as a wall duct ≤ 360 mm
- Max. length when used as a ceiling or roof penetration ≤ 500 mm
- Wall, ceiling and roof penetration can be customized to the desired length
- Please note the information in the licence

LICENSE NUMBER

Z - 7.4 - 3469

(for walls up to max. 360 mm, for ceilings and roofs max. 500 mm)

STOVE PIPES

At a glance

STOVE PIPES

Jeremias connection pipes for stoves are available in different designs. In addition to the standard FERRO-LUX, we offer ISO-LINE, an insulated variant that minimizes the required distance to combustible components as well as a solution optimized for pellet stoves which is resistant to acid and moisture.

JEREMIAS STOVEPIPE SYSTEMS ARE CHARACTERIZED BY:

- CE certification
- Simple assembly thanks to precisely fitting elements and plug connections
- No welding required on site
- TIG gas-shield welded and passivated longitudinal seams for the highest level of corrosion protection
- Condensate and gas tight
- Pellet connecting pipe: Use of high-quality sealing materials for a long service life

MATERIAL THICKNESS

- 0,4 mm
- 0,6 mm
- 2,0 mm

RETURN OF GOODS

- We accept the return of undamaged packaged goods up to Ø 150 mm
- A return of goods is only possible with a return delivery note
- For stovepipe systems we charge a return fee of 20%
- The following are excluded **from taking back**:
 - Custom made products
 - Colours brown, brown metallic, black metallic, light cast grey, special colours
 - ISO-LINE Ø 130 mm, Ø 150 mm, brushed
 - supply air systems

All prices exclude statutory VAT.
Subject to error and technical modification.
Our General Terms & Conditions apply.

System ISO-LINE

DESCRIPTION

Double wall connecting pipe for stoves and use as a visible element in living rooms, dry operation mode

MATERIAL

1.4404 (316L) / 1.4301 (304)

FINISHING

Heat-resistant senotherm paint

Brushed stainless steel
Black 702.284
Cast grey 702.288

WALL THICKNESS

Inside / Outside each 0.6 mm

INSIDE DIAMETER

130 mm and 150 mm

INSULATION

Ceramic insulation 15 mm thick

CONNECTION

Plug-and-socket connection with slip-on connector ends

ORDER CODE

The article code for your order results from:
System + article code + Ø (e.g.: 15-ISO460130)
If you require a different color, please use instead
15-ISO (black) the article code 25-ISO (cast gray)

CHARACTERISTICS

- Decreases the required clearance to flammable components from 400 mm to 200 mm (compared to normal stovepipes)

APPLICATION AREAS

- Standard heating applications for solid fuels (natural wood, coke, peat, coal*)
- Stoves

* except anthracite coal from Ibbenbüren, Germany

CE MARK NUMBER

0036 CPR 9174 038

CE CLASSIFICATIONS - DIN EN 1856 - 2

System VENTILATION SYSTEM EW

DESCRIPTION

Single-wall ventilation system for supplying combustion air to a room-air independent stove. An integrated flue gas damper prevents the circulation of cold air when the stove is not in operation.

Installation in coordination with authorised chimney sweep. Make sure that the flap is open when the appliance is operating.

Air intake system Kit-Brown

Air intake system Kit-White

System PELLET-LINE

DESCRIPTION

Connecting pipe made of stainless steel with internal gasket for connecting to pellet stoves and use as a visible element in living rooms

MATERIAL

Stainless steel 1.4404 (316L)

FINISHING

Heat-resistant silicon paint

Colours:

Unpainted

Black RAL-SI-TS70030020

Cast grey RAL-FEYCOSIL242

WALL THICKNESS

0.4 mm

INSIDE DIAMETER

80 - 100 mm

Others on request

CONNECTION

Push-fit connection retracted with special internal gasket

ORDER CODE

The article code for your order results from:

System + article code + Ø (e.g.: 15-EWPV013080)

If you require a different color, please use instead

15-EWPV (black) the article code 25-EWPV (cast gray)

CHARACTERISTICS

- Resistant to soot fires and moisture
- Pressure tight up to 200 Pa

APPLICATION AREAS

- Connecting pipe to pellet stoves

ACTIVE EXHAUST FAN E-FLOW-RS

The **E-FLOW-RS** was specially developed to improve the draft of fireplaces with low nominal heat output in single-family homes. With its **exhaust fan**, it creates an increased negative pressure in the chimney and thus supports, among other things, the lighting of fuel.

It can also be conveniently switched on using the remote control supplied when adding fuel to prevent smoke from escaping into the living space.

Together with the supplied outlet adapter, the **E-FLOW-RS** is an easy-to-install **plug & play** solution for Jeremias stainless steel chimneys.

CHARACTERISTICS

- For clean and reliable draft in the chimney
- Ideal for starting or refuelling fires
- Suitable for stoves and fireplace inserts up to a maximum of 8 kW
- Complies with the PrEN16475-2 standard for exhaust fans
- Made of high-quality stainless steel
- Heat resistant up to 250°C
- Minimal power consumption of 0.036 kW/h
- Can be switched off during operation
- Suitable for all types of fuel
- Foldable cover for easy cleaning

SCOPE OF DELIVERY

- 5 m cable
- Integrated maintenance switch
- Wireless remote control for convenient on/off operation from the living room
- Safety cable for maintenance work

Surcharge: + Copper 80 % / + Edelstahl 35 %
 Compilation: Chimney covering consists of 4 factory-riveted side panels
 The side panels can also be delivered loose on request
 Color: Sepiabrown
 Material: AL Mg3 Aluminiumblech
 All-round overhang: +15mm

- The article code for your order is: KV + chimney height + chimney dimensions (example: KV1004040)
- * For a chimney height of 300cm, the design is in two parts. Note on the copper version: Max. size for one-piece version - width 0.95m, depth 0.95m, height 2m or width 1.95m, depth 1.95m, height 1m. Other sizes on request

AIR CLEAN TOP

The "Air Clean Top" is an electrostatic fine dust separator for log or pellet fireplaces up to 50kW and is mounted on the chimney mouth. It can be connected to stainless steel chimneys as well as (with the appropriate stainless steel pipe insert) to ceramic chimneys and brick chimneys.

During electrostatic particle separation, an electric field is generated inside the "Air Clean Top" which charges the dust particles contained in the exhaust gas and pushes them against the wall of the exhaust pipe, where they combine to form larger dust particles. These can then be easily removed by the chimney sweep during the inspection.

The chimney draft is not affected by the use of a fine dust separator.

90%
ABSCHEIDUNGSGRAD

CHARACTERISTICS

- For hand-fed log and pellet fireplaces up to 50 kW
- For new builds or retrofitting
- Easy to inspect
- Tested separation efficiency up to 90%
- DIBt approval

AIR CLEAN BRICK

The electrostatic fine dust separator "Air Clean Brick" is used for single room heating systems and automatic wood heating systems up to 100 kW and is preferably installed in the attic.

It significantly reduces fine dust emissions and thus helps to improve local air quality. Both newly built and existing fireplaces can be equipped with this fine dust filter and thus operated in accordance with local emissions regulations. Installation in the attic enables simple and easily accessible maintenance.

CHARACTERISTICS

- Installation indoors, mainly in the attic
- Generous service opening for inspection and service work
- Electrode and insulator can be easily removed without having to be readjusted.
- Tested separation efficiency of up to 95%
- DIBt approval

1. Make an opening in the existing chimney Einbaurahmen einmauern
2. Brick in the installation frame

3. Attach the electrode and insulator chamber to the frame
4. Close the service opening and establish the electrical connection to the control unit

Flue gas dampers, also called Diermayer dampers after their inventor, are installed in the connecting line between the boiler and the chimney and close the flue gas path to the chimney when it is no longer needed.

This prevents the heat generator and the installation room from cooling down due to the flow protection and makes a significant contribution to saving energy.

In addition, in cascade systems, for example, they also prevent flue gases from other fireplaces connected to the chimney from flowing into the installation

room and provide a certain level of sound insulation in chimneys with multiple connections.

We offer you both manually closable flue gas dampers and flue gas dampers with an electric actuator, which are automatically controlled by the burner.

Motorized exhaust dampers MAK-N

Temperature:	up to 400 °C
Pressure-tight to the outside / housing:	Negative pressure /(NI)
Material:	1.4404 / 316L
Application:	Exhaust systems for negative pressure, parallel operation, shut-off valves, energy saving valve
Wave:	Continuous, without seal
Damper:	With annular gap for forced ventilation
System / Connection Standard:	EW-FU
System / Connection optional:	Welding end / flange
Doubeled walled design	Optional
Manual adjustment	Gear disengagement and manual adjustment lever
Optionally available on request:	Safety limit switch F4 (Price 207,00€) Auxiliary switch F1 (single, Price 111,00€), F2 (double, Price 145,00€), F3 (double, Price 216,00€)

Flue gas damper up to 400°C adjustable by hand

- Clamping screw + permanently fixed up to 0°-90°
- Control: Open-Close 90° - no auxiliary switch

Motorised flue gas damper up to 400°C Motor MAK-B1

- Gear disengagement and manual adjustment lever
- Control: open-close or 3-point
- Rated voltage: AC230V Alternatively with rated voltage AC/DC24V

Motorised flue gas damper up to 400°C Motor MAK-D1

- Gear disengagement and manual adjustment lever
- Control: open-close
- Rated voltage: AC/DC24V
- Closing time/motor running time: 4s
- Protection class: IP54
- no auxiliary switch

IMPLOSION FLAP

In large systems in particular, a Joukowski surge can occur in the exhaust pipe as a result of strong pressure fluctuations, caused, for example, by a deflagration with subsequent pressure reduction, an abrupt shutdown of the burner as a result of a power failure/defect or the burner's air inlet flaps closing too quickly.

In such a case, the hot exhaust gas flow is suddenly interrupted, which can lead to an enormously high negative pressure in the exhaust pipe and its deformation or even irreparable destruction. The use of a Joukowski flap prevents this effect. If there is a large change in pressure in the exhaust pipe, the normally closed cover plate of the Joukowski flap opens automatically via a spring mechanism and allows air to flow in to equalize the pressure. As soon as normal pressure conditions prevail again, the flap closes again and the system can resume normal operation.

EXPLOSIONS FLAP

When operating combustion engines, especially gas engines, it is possible that incompletely burned fuel mixtures can enter the exhaust pipe and cause an explosion. Therefore, the installation of a pressure relief flap (explosion flap) is recommended, especially in large systems. This allows the excess pressure caused by the explosion to escape from the system automatically in a fraction of a second, thus preventing damage to the exhaust pipe.

*1 from Ø 400 mm we recommend the use of two T-pieces and two dampers

Joukowski valve to prevent implosion (without T-piece), up to 200°C

EXHAUST SILENCERS

Overview

EXHAUST SILENCERS

Medium and high frequency noises from modern condensing boilers and fans are often perceived as disturbing, as is the low frequency hum of Chp systems.

Jeremias has been actively developing sound engineering solutions for years that effectively reduce such noise pollution. Our own silencer test bench underlines our outstanding quality standards.

Choose from a wide range of exhaust silencers for boilers, Chp, biomass and other systems and let our experts advise you individually when looking for silencer solutions for your project.

THERE ARE MANY REASONS TO CHOOSE EXHAUST SILENCERS FROM JEREMIAS:

- Extensive range of standard silencers for every application
 - Individual advice
 - Silencer production according to customer requirements and implementation of special designs
 - On-site sound measurements according to DIN EN45635 Part 47 including measurement report (price on request)
 - Acoustic calculation of exhaust systems
-

SURCHARGES FOR DIFFERENT VERSIONS

MATERIAL

- 1.4539 Condensate acid resistant up to 400°C (+60% on flue gas-carrying parts)
- 1.4828 Operating temperature up to 1000°C, price on request
- Others on request

MATERIAL THICKNESS

- 0,6 - 3,0 mm (depending on product))

RETURN OF GOODS

- No returns possible

SEAL

The seal supplied varies depending on the diameter (EPDM up to 120°C or silicone up to 200°C). You can find all possible options in the table on the next page. The prices of the variants not listed in the price list are available on request.

Attenuation: These are attenuation classes. More precise attenuation spectrum in the technical data sheet.

Installation: H = Horizontal, V = Vertical Follow the installation instructions for the exhaust system.

Classification: Corresponds to the classification of the selected connection system

! = Possible uses must be clarified on a case-by-case basis

THE PERFECT EXHAUST SI

In addition to our standard silencers, we also offer exhaust silencers that are specifically tailored to the individual project requirements of certain areas of application, installation situations and sound requirements - from small boilers to industrial plants!

Talk to us - our experts will be happy to advise you!

- ^{*1} for further flanges we will send you our extra flange overview

Whenever the noise emissions of an exhaust system must fall below certain limits or noise problems caused by the heat generator must be eliminated, we recommend a professional sound measurement.

Our specially trained staff measures the noise emissions at the chimney outlet in accordance with DIN EN 45 635 Part 47. The data obtained can then be used for an optimal silencer design.

Scope of services for sound measurement

- On-site assessment of the system
- Measurement of the emission sound level at the chimney outlet
- Use of a sound level meter of the highest accuracy class 1
- Measurement of the resting/background noise level
- Testing for low-frequency noise

Measurement report with total level and sound spectrum

Price from 500 euros (plus travel and overnight stay if necessary)

Interested in a sound measurement of your project?

Our experts will be happy to advise you!

TERMS & CONDITIONS

General sales terms and delivery conditions

1. General

The following General Terms & Conditions apply for all contracts between ourselves and other companies (hereinafter referred to as the „Buyer“) as outlined in § 14 of the German Civil Code. The sale and delivery of goods shall occur exclusively under the general sales terms and delivery conditions stated below. Any kind of collateral agreements, deviations and assurances must be confirmed in writing. The purchase conditions of the Buyer are not part of the agreement, even if we do not expressly contradict them. These delivery and payment terms are part of all agreements made with us relating to the delivery of goods and shall also apply to current and future transactions. As part of general business relations, our business partners are obliged to refrain from passing any received information to unauthorised third parties as well as store this information safely and prevent unauthorised persons from accessing and misusing it.
2. Offers and acceptance

Our offers are always non-binding and without obligation. In a legal sense, they only represent a request to the Buyer to submit a contractual offer. The order placed by the Buyer represents an offer made to us to conclude a purchase contract. The Buyer is bound by the offer for ten days after we receive the offer. The contract takes effect when we accept the Buyer's order. The order is considered accepted when we send separate confirmation of the goods are dispatched by us and received by the Buyer. The contract shall be concluded with the proviso that, if we ourselves are not correctly or properly supplied, we are not obliged to perform the contract, or may only partially perform the same. This shall only apply in cases where we are not responsible for failure to deliver. If the goods are unavailable or only partially available, the Buyer shall be informed immediately. Any payments shall be reimbursed without delay.
3. Terms of payment

Our prices are without obligation and are quoted ex works excluding VAT. Unless otherwise agreed, delivery within Germany shall be free of charge provided the net order value exceeds EUR 1500. If the net order value is less than EUR 1500, a flat-rate freight charge of EUR 150 shall be added to the order value. All discount and payment agreements are revised annually and apply up to 31.12. of the current calendar year at the latest.
4. Payment terms

Unless otherwise agreed, payment must be received within 21 days of the invoice date. If payment is received within 8 days of the invoice date, a 2 % discount can be applied unless otherwise agreed and provided no previous invoices originating from the same contract or other contracts are outstanding. Proof that the invoice has been sent to the supplier by us is sufficient evidence of the invoice being received. 2 working days are added to the date of dispatch to create an adjusted receipt date. No discount can be granted for payments by bill of exchange. We shall not be obliged to accept bills of exchange as payment. The Buyer is responsible for paying bank discounts and expenses. Bills of exchange and cheques will only be accepted on a conditional basis. If the payment terms are not met, an interest rate of 0.8 % shall be applied for every month or part thereof. Interest is not paid for advance payments. If after conclusion of the contract, circumstances become known that call the creditworthiness of the Buyer into question, we have the right to call in all claims for payment from the Buyer immediately, notwithstanding any other rights. The Buyer is only entitled to set off claims that are defined as undisputed, recognised or legally binding. Furthermore, the Buyer can only assert rights of retention based on counter-claims that are defined as undisputed, recognised or legally binding. Withholding payment based on counter-claims from the Buyer which are not recognised by the supplier is not permitted and neither is offsetting for those claims.
5. Retention of title

The goods are supplied subject to retention of title and the following additional provisions:
 - a) We shall retain ownership of the delivered goods until all claims resulting from the business relationship, either for current or future claims, or other legal grounds between us and the Buyer have been settled. This also applies for deliveries to third-party premises.
 - b) In the case of a running account, the reserved title shall constitute security for our balance claim.
 - c) Handling and processing of our goods shall take place for us, without any obligation on our part and without affecting our right of ownership under § 950 of the German Civil Code. If the Buyer incorporates, combines or mixes the items to which we hold ownership rights with other items not belonging to us, we acquire co-ownership of the new object in proportion to the value of all processed goods at the time of processing. The new product created from the processing shall therefore be considered as reserved goods for the purpose of these general sales terms and delivery conditions.
 - d) The Buyer is obliged to immediately notify us in writing of possible third-party access to the items of which we are owners or co-owners or the demands and claims assigned to us as well as any damage these objects have sustained.
 - e) We are entitled at any time to demand the surrender of goods belonging to us if the fulfilment of our claims appears to be jeopardised or the Buyer or his customer infringe obligations that are incumbent on them. Rights of retention cannot be asserted against this return claim.
 - f) Should the Buyer sell goods to third parties which were created from handling and processing and combining or merging the reserved goods with other goods, he shall assign to us any claims against the third party debtor proportional to the value of the handled, processed, combined or merged reserved goods according to the above-mentioned provisions.
 - g) The Buyer is entitled to sell the reserved goods to third parties as part of day to day business. He already assigns any claims which he has against third parties at the full amount until complete payment of the purchase price.
 - h) The Buyer is authorised to collect the claims assigned to us. At the request of the seller, the Buyer must inform the third party debtor immediately of the assignment as well as provide the seller with the third party debtor's address information without delay.
 - i) We can revoke authorisation for resale and collection of the claim assigned to us if we have good reason to call the creditworthiness or solvency of the customer into question or due invoices (also discounted invoices) have not been settled before the deadline specified.
6. Dispatch and transfer of risk

Once the goods are transferred to the dispatcher/haulier, risk is transferred to the Buyer. In the case of damaged parts, the Buyer shall in his own interest obtain a certificate with respect to such damage upon receipt of the goods in order to safeguard his claims for damages. Transport insurance shall only be concluded at the request and cost of the Buyer.
7. Warranty

In the case of defects in the supplied goods, the following warranty regulations apply:
 - a) The properties and intended purpose of the purchased items are based solely on the product description provided by the seller. Deviating agreements require written confirmation.
 - b) The Buyer is obliged to immediately inspect all deliveries, including partial deliveries. All identifiable defects, including missing items and incorrectly delivered parts, must be reported in writing within two weeks at the latest, but always prior to processing, installing or reselling. Hidden defects must be reported immediately after being discovered. Other obligations outlined in § 377 of the German Commercial Code remain expressly unaffected.
 - c) If the Buyer identifies defects on the goods, he shall not be authorised to make use of the goods, i.e. the Buyer may not split, resell or further process the goods, until agreement has been reached as to how to deal with the complaint or the warranty claim has been definitively rejected by us.
 - d) We shall meet the warranty claims of the buyer at our own discretion to the exclusion of ongoing claims through subsequent performance or new delivery. If the defect cannot be rectified after two reasonable deadlines and we reject sending a replacement delivery, the Buyer can request a reduction in the purchase price or withdraw from the contract. The special provisions outlined in these general sales terms and delivery conditions apply for claims for damages.
 - e) Warranty claims do not exist in the case of negligible deviations from the agreed characteristics or if usability is only insignificantly affected.
 - f) Liability for material defects are subject to the statute of limitations. In cases of subsequent performance, the statute of limitation period does not start anew.
 - g) It is expressly noted that DIN EN 13384 forms the contractual basis between the seller and the Buyer. The seller cannot be held liable for defects resulting from a failure to observe DIN EN 13384.
8. Claims for compensation

In all cases in which we are obliged to reimburse damage or expenditure on the basis of contractual or statutory claims, we shall only be liable to the extent that we, our executive employees and vicarious agents are guilty of wilful intent, gross negligence or death or injury or an impairment to the health of another. No-fault liability in accordance with the product liability law shall not be affected. Liability for the culpable breach of fundamental contractual obligations also remains unaffected. However, liability is limited to typical damage as may be predicted in such contractual situations, except for the cases outlined in clause 1. An alteration of the burden of proof to the disadvantage of the Buyer is not associated with the above provision.
9. Delivery times

Specified delivery times are initially non-binding and only become binding on confirmation of the order by the seller. Delivery times and dates must be agreed in written form. Terms of delivery shall commence with the conclusion of contract. If we are waiting for assistance or information from the Buyer or are otherwise delayed in performing our obligations through no fault of our own, the delivery dates and times can be extended to compensate for the duration of the delay and may include an appropriate preparatory period at the end of the delay. We are obliged to inform the Buyer of the delay prior to such extension. Partial deliveries are permitted, provided they are reasonable for the Buyer.
10. Manufacturing according to customer instructions

In the event of manufacture in accordance with drawings, samples or other instructions from the Buyer, we shall provide no warranty and assume no liability with regard to the functionality of the product and other defects, provided such circumstances are based on the instructions of the Buyer. The customer indemnifies us from possible claims by third parties, also arising from product liability, against us because of damage caused by the goods, unless we have caused such damage deliberately or out of gross negligence.
11. Final provisions

Only formal and substantive German law applies to this contract, with the exclusion of international trading rules (UN Convention on Contracts for the International Sale of Goods, CISG) as well as the exclusion of references to foreign law from German private international law. The place of performance for delivery and payment is 91717 Wassertrüdingen in Germany. If the Buyer is a merchant or legal person as defined in public law, our business headquarters are agreed as the place of jurisdiction. Should individual clauses of this agreement become invalid, partially invalid or impracticable, the validity of the remaining provisions remains unaffected. The parties shall agree to replace the invalid, partially invalid or impracticable clause with a provision that most closely approximates the purpose of the invalid, partially invalid or impracticable clause. Should the parties fail to come to an agreement and if the parties so desire, the invalid, partially invalid or impracticable clause shall be replaced by the statutory provision that most closely approximates the purpose of the invalid, partially invalid or impracticable clause.

MANUFACTURER WARRANTY

I. General

In addition to the statutory warranty, Jeremias offers this manufacturer's guarantee in respect of Jeremias products to specialist companies/dealers (it does not apply to bought-in merchandise). It is valid irrespective of any mandatory liability provisions, for example as set out in product liability legislation, in cases of wilful intent and gross negligence, injury to life, body or health by Jeremias or its agents.

A „specialist company/dealer“ within the meaning of this manufacturer's guarantee is any legal entity that has acquired a product in order to resell it or install it for third parties in pursuance of its commercial or self-employed professional occupation.

II. Guarantee

Applies to Jeremias products purchased by the specialist company since 01.01.2013 (purchase receipt) that can be shown to have been installed in the proper manner:

Jeremias guarantees the specialist company that its products have been manufactured from corrosion-resistant materials. Indicative in this regard is the state-of-the-art at the time the product was manufactured. Claims for compensation for consequential loss or product liability exist only insofar as permitted by the mandatory statutory provisions.

This guarantee is valid for a period of 25 years from date of purchase by the specialist company, but no more than 25 years and 3 months from the date of manufacture. The guarantee period is not extended by the rendering of any benefit within the framework of this guarantee, and especially not in the event of a repair or replacement. The guarantee period does not start afresh in such cases.

III. Written notification of a fault

The specialist company can avail itself of the rights under this guarantee against Jeremias by submitting a written notification of a fault within the guarantee period. A precondition in this respect is that the specialist company notifies Jeremias of the fault within two months of the date when it became aware of it or must have been aware of it. The onus is on the specialist company to prove that the guarantee has not expired (for example by submitting the purchase receipt and a copy of the installation report of its end customer). Where appropriate, Jeremias is entitled to specify the date of manufacture as the start of the guarantee period.

IV. Benefits in a guarantee case

Jeremias is free to decide to repair the product, to replace it or to refund the purchase price.

Normally, the specialist company will, with the prior agreement of Jeremias, repair the faulty product itself or arrange to have it repaired on site by another specialist organisation. In this case, the guarantee covers the free delivery of the necessary spare parts. Should Jeremias agree in writing to carry out the repair itself, Jeremias will then bear the costs associated with spare parts, installation and its own labour costs, in addition to any costs arising from the transport or delivery of the product. The end customer must provide access to the product. In the event of a replacement, the old product will be replaced free of charge by a new product of the same type, quality and model. If the product in question has been discontinued at the time of the claim, Jeremias shall be entitled to supply a similar product.

Transport and delivery to and from Jeremias and to and from the dealer, every removal and reinstallation of the product or any other special measure may only be carried out with the prior agreement of Jeremias. If Jeremias agrees to the proposed measure, Jeremias will bear the costs associated with its implementation. Unless agreed otherwise, the specialist company undertakes to collect the new product from the nearest Jeremias dealer.

Should Jeremias elect to refund the purchase price and this decision is confirmed in writing, the user will return the product to Jeremias and Jeremias will refund the purchase price.

V. Conditions and exclusions

A condition for the validity of this guarantee is that the product has been professionally installed and maintained according to the operating/installation instructions and the applicable state-of-the-art (e.g. by a specialist business or an authorised technical company) and adherence to the operating instructions and the use of Jeremias products in accordance with the technical instructions, servicing manuals and product certificates provided by Jeremias.

These conditions include, but are not limited to, acceptance of the system by a chimney sweep and the carrying out of regular maintenance and inspection work.

Assembly instructions, instructions for use and servicing instructions are enclosed with every product and can be found at www.jeremias.de.

The guarantee does not cover claims for:

- freestanding steel chimneys and its components
- System DW-ROASTER
- wearing parts, e.g. seals
- pipes and components made of plastic and copper
- stove pipes FERRO-LUX
- paintwork
- moving parts, such as compensators, flue gas dampers, draught regulators,
- chimney doors, etc.
- flexible piping
- insulation
- consumables, e.g. granulates
- merchandise provided by other manufacturers
- minor deviations from the expected quality of Jeremias products that have no effect on the practical value of the product;
- defects to the product caused during the installation, transport and trial operation of the purchased item and finally

- demonstration products, etc

The guarantee is no longer valid in the event of:

- non-compliance with the assembly and servicing instructions and the instructions for use provided or those available for reference at www.jeremias.de
- assembly, maintenance, repair or servicing by unqualified personnel
- product damage caused by the purchaser, installer or third parties
- damage due to the usage of anthracite coal
- damage due to normal wear and tear or wilful damage
- in the case of negligence, a contributory negligence will be charged by mutual agreement
- product damages caused by a soot fire
- improper installation or start-up
- inadequate or improper maintenance
- products that have not been or are not being used in accordance with their intended purpose;
- damage due to force majeure or natural disaster, in particular, but not exclusively
- in the event of damage caused by flood, fire or frost.

VI. Exclusions from the guarantee

If a product defect is shown to be not covered by this guarantee, the costs incurred in sending and transporting the product will be borne by the specialist company/dealer. In addition, the specialist company/dealer bears the costs, including any labour costs, resulting from the examination of the product as well as the costs for dismantling and re-installing the product. If the specialist company/dealer is notified that there are no grounds for a claim under the guarantee, then it must pay for the costs that result from the repair work it requested as well as the costs for the spare parts and labour.

If the defect was not apparent on the product when it was delivered, then Jeremias will at its discretion and on a case-by-case basis decide whether it should be rectified as a gesture of goodwill. In this instance, the specialist company/dealer is not legally entitled to have the defect rectified.

VII. Statutory rights

The user enjoys statutory rights in addition to those under the guarantee. These under certain circumstances more favourable rights for the specialist company/dealer are not restricted by the guarantee. Neither does the guarantee affect the rights available to the user against the specialist company/dealer.

VIII. Prior to assembly:

IMPORTANT!

Make absolutely certain that the ambient air and combustion air is not contaminated by chlorinated hydrocarbons.

Possible sources of chlorinated hydrocarbons include:

Industrial sources	
Chemical cleaning	Trichloroethylene, Tetrachloroethylene, fluorinated hydrocarbons
Degreasing baths	Perchloroethylene, Trichloroethylene, methylene chloride
Print shops	Trichloroethylene
Refrigerating machines	Methylene chloride, Trichlorofluoromethane, Dichlorodifluoromethane
Domestic sources	
Cleaning and degreasing agents (detergents, hair sprays)	Perchloroethylene, Methyl chloroform, Trichloroethylene, Methylene chloride, Tetrachlorocarbon, hydrochloric acid
Hobby rooms	
Solvents and thinners	Various chlorinated hydrocarbons
Aerosol sprays	Chlorinated/fluorinated hydrocarbons (Frigene)

- If wood is being burned, ensure that only natural wood that has not been painted
- or preserved in any way is burned. Ensure that natural wood has been held in storage for at least 2-3 years and that a residual moisture level of 20% is not exceeded. The assembly and operating instructions and requirements of the furnace manufacturer must also be observed.
- No chipboard, domestic waste, etc. may be burned.
- It is essential that the components do not come into contact with any ferritic metals or metals of an inferior quality.
- Handle the individual elements with the greatest of care. This will mean:
 - Finding a suitable storage location on the site.
 - Storing the components flat or at least in such a way that they cannot fall over.
 - Unpacking the individual parts immediately prior to assembly.
 - Protecting the elements at all times from flying sparks and dirt.

X. Place of performance, place of jurisdiction and governing law

This guarantee is subject to German law to the exclusion of the UN treaty concerning contracts for the international sales of goods (CISG) of 11 April 1980. The place of performance for obligations arising from this guarantee is Wassertrüdingen, Germany.

As far as legally permissible, the place of jurisdiction is Ansbach, Germany.

A small, handwritten signature in blue ink, located in the bottom right corner of the warranty document.

MANUFACTURER'S WARRANTY FOR FLUE SYSTEMS MADE OF POLYPROPYLENE (PP)

Jeremias grants the warrantee of exhaust gas components and/or exhaust systems made of polypropylene (PP) a manufacturer's warranty of 6 years in accordance with the following warranty conditions. The guarantee applies without prejudice to the statutory warranty rights to which the warrantee is entitled against the seller (regardless of whether this is Jeremias or another seller) or installer, as well as without prejudice to mandatory statutory liability provisions. The warranty does not affect the warranty holder's statutory rights.

Jeremias Abgastechnik GmbH
Opfenrieder Str. 12
91717 Wassertrüdingen
Germany

I. Subject of the guarantee

The guarantee is granted for built-in flue gas-carrying components for connectors and/or vertical flue systems made of polypropylene (PP) from Jeremias; flue gas-carrying components that are subject to natural wear and tear are excluded (control covers, long sleeves, Vario plugs, silencers, gaskets of any kind) and flue gas components that absorb linear expansion so that gaskets may have to be replaced during maintenance work. Products from other manufacturers are not covered by this guarantee.

II. Guarantee protection

The guarantee applies to the above-mentioned products that were sold on or after November 1st, 2014. The guarantee is limited to 72 months. The date of the delivery note is decisive for the start of the guarantee. If a delivery note is not available, the guarantee begins on the date of purchase by the guarantee holder. The duration of the guarantee remains unaffected by services provided under the statutory guarantee or this guarantee. If flue systems or components are exchanged or delivered as a replacement, no new guarantee is granted and the guarantee period is not extended.

III. Guarantee case

A guarantee case requires that an item subject to the guarantee exhibits a material defect (hereinafter: „Defect“) according to the definition in § 434 Paragraph 1 BGB and that the defect is due to material or manufacturing defects. Damage caused by third-party negligence and external influences (such as transport damage, improper storage, improper assembly, non-compliance with the installing instructions, improper use or operation, excessive temperature stress, fires or the effects of violence) do not constitute a guarantee.

IV. Services in the event of a guarantee

In the event of a guarantee, Jeremias will, at its own option, either repair the item subject to the guarantee or deliver a new or replacement delivery free of charge. The guarantee does not include any claims for damages.

V. Requirements and conditions of use

The guarantee and its claim are linked to the following prerequisites and conditions:

- (a) Claims from the guarantee are to be addressed directly to Jeremias.
- (b) Any defect must be reported to Jeremias immediately (hereinafter: „Notification of Defects“). Without prejudice to this, claims from this guarantee are excluded if the notification of defects is received by Jeremias later than 1 month after the guarantee period has expired (in accordance with section 2).
- (c) The warranty holder must send the following documents to Jeremias within 3 weeks of the notification of defects:
 - Delivery note or proof of purchase to prove that the guarantee case occurred within the guarantee period;
 - Certificate from a licensed heating or chimney construction company regarding the proper installation and commissioning of the fireplace and the flue gas system;
 - Proof that the initial installation and commissioning of the fireplace and the flue system were sufficient in accordance with building regulations by means of an acceptance report from the responsible district chimney sweep (acceptance must take place within 2 weeks of initial installation and commissioning) or, if applicable, by means of a commissioning report;
 - All measurement reports of the emission tests since the first commissioning of the fireplace to prove compliance with the recommended maintenance intervals;
 - Maintenance contract and maintenance certificates for the fireplace, if available.
- (d) The exhaust system was always operated as intended in accordance with the assembly instructions, assembly instructions and approvals that accompany the product, as well as the general rules of technology and applicable law. You can obtain more information from your heating installer or at <https://www.jeremias.de/downloads>. Jeremias reserves the right to check the intended use of the Jeremias components or Jeremias flue systems in the event of a guarantee.
- (e) The warrantee transfers the claimed parts to Jeremias. He has to send this to Jeremias at his own expense. If one of the aforementioned prerequisites / conditions is not taken into account or adhered to, Jeremias is entitled not to provide the guarantee.

VI. Spatial scope

The benefits from the guarantee are limited to items (according to section 1.) that the guarantee holder has bought and operated in Germany.

VII. Applicable Law

This guarantee is subject to the laws of the Federal Republic of Germany.

YOUR PROJECT IS IN GOOD HANDS WITH US!

Our experts advise you personally on everything from chimney design, planning, production up to installation..

TOGETHER WITH YOU

we plan all the necessary process steps and are happy to take into account your individual requirements and wishes.

THIS IS HOW WE DEVELOP

the most optimal chimney solution for your project and turn even the most demanding projects into a great success.

OUR RANGE OF SERVICES INCLUDES:

- Complete project management
- Personal advice
- Planning
- Construction
- Production
- Transportation
- Assembly
- Maintenance / condition monitoring

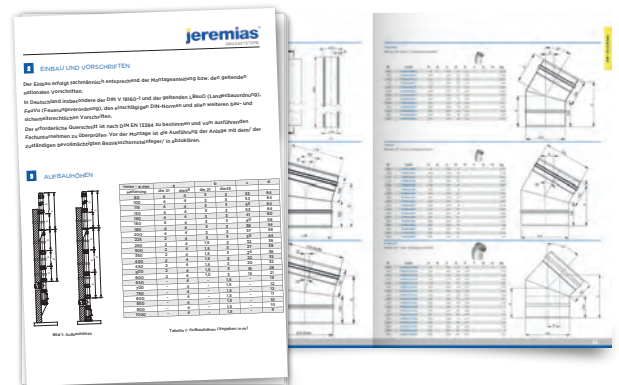

FURTHER INFORMATION

You will find a large number of continuously updated documents and tools on our website.

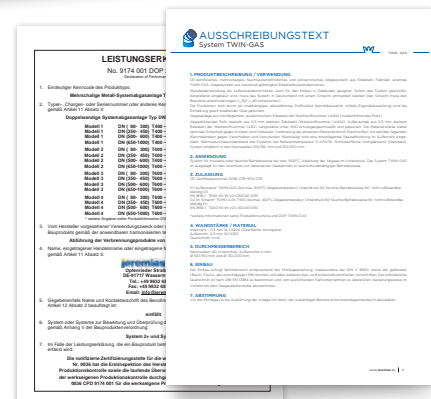

DOCUMENTS FOR PLANNING AND ASSEMBLY

Technical planning documents with drawings and product dimensions, installing instructions and application notes

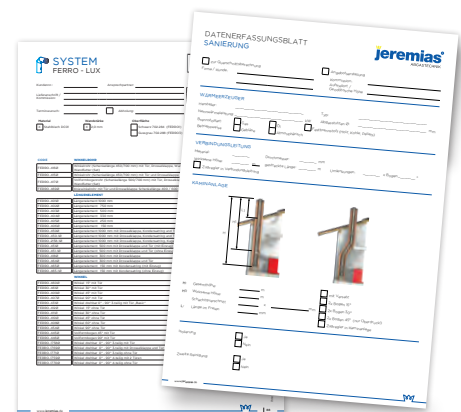

APPROVALS AND TENDER TEXT

Tender texts, declarations of performance, approvals and certificates

FORMS

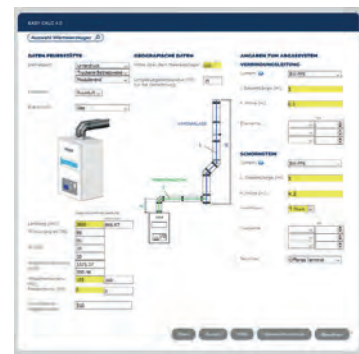

Interactive forms for your order as well inquiry forms or data entry forms

SOFTWARE

Programs for simple cross-section calculation as well as for easy calculation of offset dimensions, data norm files and the current price list as an excel file

PRICE LISTS AND BROCHURES

Current Jeremias price list, system price lists, product overviews, brochures as pdf for download or as an eBook
